The Waste Batteries and Accumulators Regulations 2009

Part 5: Producer obligations: Industrial and Automotive Batteries

As a producer of industrial batteries under the Waste Batteries and Accumulators Regulations 2009, Fox Lux Limited produce Lithium Ion batteries (NMC and LFP).

We are obliged to take back free of charge, waste industrial batteries supplied to an end user for treatment and recycling. We are required to do this in any calendar year we place new industrial batteries on the market. If any of our customers or in certain cases other end users, require us to take back industrial batteries, they should contact us by email to hello@fox-lux.co.uk

We will agree the necessary arrangements for the return, proper treatment and recycling of the waste industrial batteries.

The Waste Electrical and Electronic Equipment Regulations 2013

The regulations set different obligations for B2C and B2B routes to market. Fox Lux only supply B2B and our responsibilities for compliance to the WEEE Regulations 2013, are handled by Lumicom, an approved organisation which specialises in handling of lighting WEEE.
